## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Patent No. 6,797,526 to Tanaka et al. is the reference closest to the claimed invention. Tanaka et al. disclose a method for early warning management of at least one piece of semiconductor equipment, each piece of equipment processing a plurality of semiconductor products according to at least one corresponding process parameter, the method comprising: recording each process parameter for each piece of equipment and recording processing conditions of each piece of equipment as at least one corresponding equipment parameter when each piece of equipment is processing; evaluating and recording the quality of semiconductor products and corresponding testing parameters after each semiconductor product has been processed; and analyzing a relationship between the corresponding process parameter, the corresponding equipment parameters, and the semiconductor product quality for each piece of equipment. However, Tanaka et al. do not teach selectively utilizing equipment and process parameters so as to optimize the quality and performance of processed semiconductor products; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
